

B4C Reader R2 and C1

At a glance

The B4C-Readers are the first of its kind worldwide. The systems detect shape and orientation of Test Cassettes with innovative "Intelligent Shape Detection (ISD) Technology". Rapid Tests are recognized, adequately rotated and analyzed within seconds. The ISD-Technology also prevents mixing-up Tests by identifying the shape of the cassettes.

Cassettes are digitalized and archived for future use in connection with the B4C- Software

- > Digitalization of Cassettes within seconds
- > ISD-Technology identifies shape and orientation of the Rapid Test
- > Controlled directly from within the B4C-Software
- > Several Test Cassettes can be analyzed simultaneously
- > Prevents mixing-up Tests during analysis
- > R2-Model: Reader for up to 12 Cassettes with Embedded PC
- > C1-Model: Compact Desktop Reader for single Cassettes

Compact Reader C1
